Product catalogue

A family-owned business committed to the Pacific

Established in 1998, PII is a trusted one-stop shop for the building and construction needs of the Pacific Islands.

Disclaimer of liability

The information published in this Retail Hardware Brochure has been sourced by various suppliers and other sources and are not verified by the publisher. While we have taken care in the preparation of this book Pacific Islands International accepts no liability for any errors or omissions. This book should be only used as a guide.

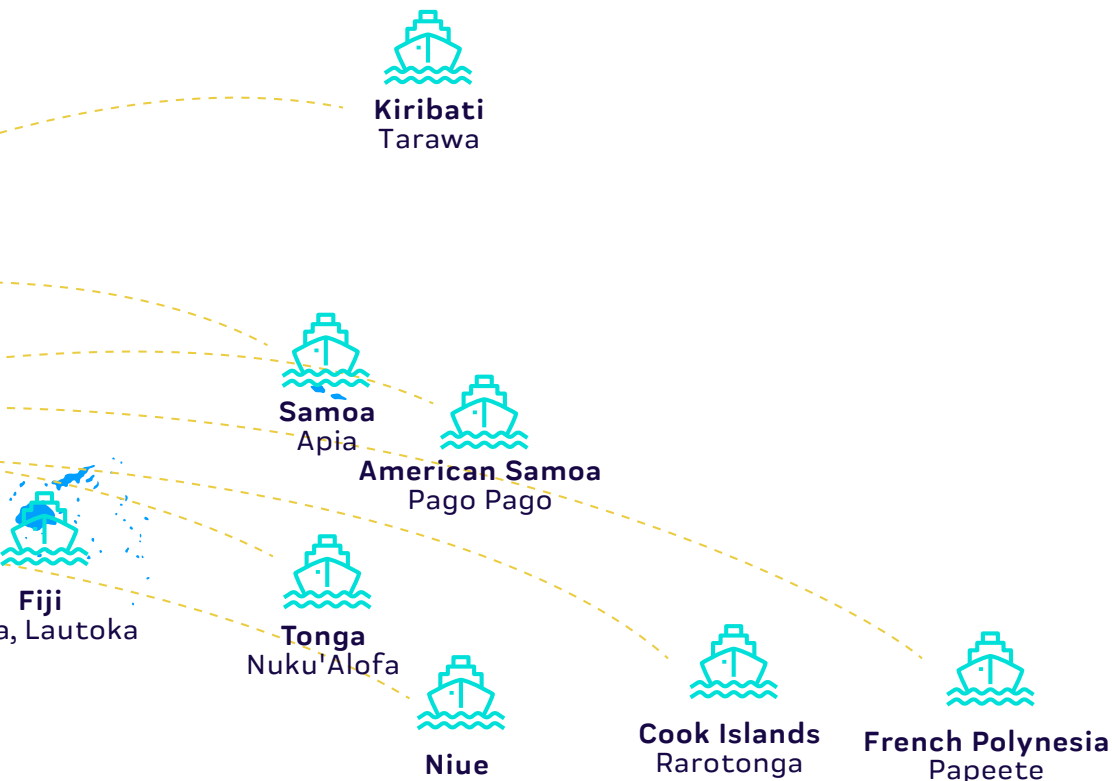

PII was the first business of the Finn Pacific Group, which was founded in 1998 and also includes electrical solutions provider Power Protection Industries (PPI) and paint supplier Luxury Exports.

With a global sourcing reach, PII has offices in both Australia and China supplying materials and products to a variety of industries whilst representing many leading Australian, New Zealand, Asian and European suppliers. As a company with focus on building and maintaining strong supplier relationships, PII is committed to passionately representing the products and materials it sources – acting as advocates for suppliers at every opportunity.

PII was the first business of the Finn Pacific Group (FPG) – a parent company founded by Mick and Carol Finn, and now led by Carol and their children, Ashley and Renee. As both PII and FPG look to the future, they continue to combine outstanding products and materials with the kind of warm, friendly and family-centric service that’s led to ongoing expansion and continued business success.

PII has developed relationships with importers throughout every nation in the Pacific region.

GYPROCK®

Everything else is just plasterboard

CSR Gyprock is Australia's leading manufacturer of gypsum based products such as plasterboard and cornice, as well as compounds, adhesives, specialty plasters and associated finishing materials and accessories. Gyprock supplies a comprehensive range of high performance products and systems for many applications to meet fire, acoustic and thermal requirements across all segments of the construction industry.

Standard Plasterboard

Standard plasterboard doesn't get better than this – ideal for use on walls and ceilings in residential environments, Gyprock Plus features Optimised Core technology, making it stronger and lighter with significantly improved board handling. Available in 10 and 13mm.

Soundchek Plasterboard

Gyprock Soundchek provides sound control worth shouting about. This high density gypsum plasterboard has improved sound transmission properties to help maintain the peace when used in residential and commercial walls and ceilings. Available in 10 and 13mm.

Aquachek Plasterboard

Gyprock Aquachek is a moisture resistant wall and ceiling plasterboard designed as the perfect lining for wet areas. It is available in 10mm and 13mm thicknesses for residential and commercial applications.

Impactchek Plasterboard

Bustling household or commercial environment? Gyprock Impactchek is a high-strength 13mm thick plasterboard with a reinforced core that is an ideal wall lining for high impact areas

Fyrchek Gyprock Fyrchek has been developed to take the heat. Fyrchek's specially processed glass fibre-reinforced gypsum core makes it ideal for use in fire rated wall and ceiling systems and where improved acoustic performance is required. Available in 13 and 16mm.

Perforated Plasterboard Attractive and high performance perforated boards for acoustic applications.

ECO8 Complete Complete by name and Complete by nature: for commercial environments, this ultimate plasterboard is specifically engineered to meet the highest standards across a broad range of performance requirements. ECO8 Complete is manufactured with a dense, fibre-reinforced core and is specially formulated to provide superior performance for mould, impact, fire, acoustic and moisture resistance making it an excellent choice for most commercial applications. Available in 13 and 16mm.

Cornice Full range of decorative cornices to add a designer touch to any style of building.

Ceiling Tiles Ceiling tile options suitable for exposed-grid ceiling applications.

GLASROC F Gyprock Glasroc F is a 30mm thick, paperless, high density, square edged gypsum board designed as a frameless encasement for structural steel beams and columns to provide a fire rating of up to FRL 120/-/-.

Adhesives and Sealants Specially formulated adhesives and sealants for installation of plasterboard and cornice.

Jointing Tapes Options for reinforcing jointing tapes, required for the jointing process.

Jointing Compounds Base coat, topping and all-purpose compounds for jointing Gyprock plasterboard.

Bradford™ more than insulation

Bradford Insulation is Australia's leading supplier of insulation, acoustic control & energy saving products for homes & commercial buildings.

Residential Bradford Insulation is Australia's leading brand of domestic insulation, providing glasswool, rockwool and foil products to meet all the insulation needs of a home builder or owner.

Applications include:

- Thermal insulation in ceilings, walls and under floors
- Acoustic insulation
- Sarking for under tiled roofs
- Condensation control for metal roofs
- Ventilation of roof, bathroom and living spaces

Commercial Bradford offers a full range of glasswool, rockwool, PIR and foil insulation products, as well as specialty products designed for commercial buildings.

Applications include:

- Metal roofing
- Airconditioning systems – external and internal lagging, and flexible ducting
- Curtain wall
- Fire protection
- Partitioning
- Ceilings
- Silencers
- Acoustic absorbers
- Industrial ventilation

Industrial Bradford provides a range of Fibertex rockwool and Bradford glasswool products for heavy industrial markets including the insulation of storage tanks, process vessels and piping, as well as automotive, and other industrial applications.

Applications Include;

- HVAC Ducting – Internal and External
- High Temperature Applications
- Underslab and under soffit

Ventilation We offer total system solutions for commercial, residential and industrial buildings that increase energy efficiency and comfort. We have the widest range of ventilation products available in Australia. Our products work with a wide variety of building materials to reduce heat build-up and manage condensation under floors, in living areas, and roof spaces, creating purer, healthier air.

Applications Include:

- Factories
- Retail Offices
- Warehouses
- Schools, Auditoriums and Gymnasiums
- High Rise Apartments

Bradford Gold Wall Batts

Bradford Gold insulation for walls can reduce energy used for heating and cooling by up to 20% leading to a decrease in your energy consumption and in your energy bills.

Bradford Gold High Performance Batts

Bradford Gold Hi-Performance wall batts are a high density insulation for the ultimate in comfort and energy efficiency when installed in exterior walls. Available in R-Values of R2.0 to

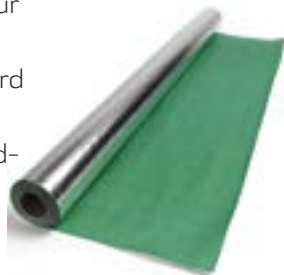

Soundscreen

CSR Bradford's SoundScreen is Australia's most trusted sound insulation to reduce noise transfer around the home, with added temperature

Thermoseal Wallwrap

Bradford Thermoseal Wall Wrap is a tough medium duty weather barrier designed to enhance your home's thermal performance and weather resistance. Bradford Thermoseal Wall Wrap also protects new homes from wind-driven rain and dust during construction.

Polyair Performa XHD

Polyair Performa XHD is an extra heavy duty high grade reflective insulation. It boosts the thermal performance of roofs and walls while improving the comfort and energy efficiency of sheds and warehouses

Thermofoil 729 Light Duty Foil

730 Medium Duty Foil

731 Fire Rated Foil

753 Heavy Duty Foil

Bradford offers a range of products designed to meet your commercial roof sarking requirements. These products are manufactured from reflective aluminium foil with anti-glare coating on one side.

Martini Polyester

Engineered to provide high-performance sound absorption across a broad range of frequencies. Ideal behind open slatted ceiling systems, perforated panelling and outdoor environmental acoustic applications.

Multitel

Bradford Multitel is a low density lightweight insulation used for externally lining duct work.

Ultratel

Bradford Ultratel is designed as a high performance internal insulation on HVAC ductwork. It also has many applications as a general insulation product to enhance both thermal and acoustic performance.

Windmaster

The high quality, roof mounted, aluminium ventilator combines classic design with high tech features for guaranteed long lasting performance.

SolaBrite

A range of roof mounted, tubular skylight systems allowing natural light into dimly lit living areas of the home.

Hurricane

Hurricane range of vertical vane natural ventilation technology has been built to endure the tough conditions and operating environments.

RONDO®

Leading manufacturer and supplier of wall and ceiling systems, along with complementary accessories, to the building industry.

Access Panels We have Access Panels to suit every situation. Whether you need a standard Access Panel, or a specialised architectural panel, PANTHER® Access Panels are the perfect choice.

- Budget Lock Set Bead
- Sound Rated Access Panels
- Metal Faced Access Panels
- Fire Rated Access Panels

Finishing Sections Rondo has a range of finishing sections for plasterboard, render and texture applications. This includes both Steel and PVC finishing beads.

- Corner Beads
- Plaster Stopping Bead and Angles
- Shadowline
- Expansion Joints

Ceilings Rondo ceiling systems are highly innovative and of superior quality, with both concealed grid or exposed grid options, we have a solution available to meet acoustic, fire-rated, wind loading and seismic design requirements

- Exposed Grid Ceiling Systems
- Concealed Grid Ceiling Systems
- Steel Stud Ceiling Systems

Walls Rondo steel wall framing systems provide a durable, practical and lightweight structures for internal plasterboard walls to create attractive spaces within buildings, or external wall systems to provide direct support of the exterior cladding and interior linings.

- Steel Stud & Track Wall Framing Systems
- MAXIFrame External Wall Framing Systems
- Quiet Stud Sound Insulation

Angles

Australian owned and manufactured, Weathertex's external timber cladding is the ideal solution for any builder, architect or designer. Weathertex timber cladding is one product that ticks all the boxes and complies with the Building Code of Australia (BCA) compliance requirements. Australian-owned and manufactured with a better than-zero carbon footprint, Weathertex is the ideal

solution for any builder, architect or designer in search of environmentally conscious and high-quality materials.

Weatherboards Our Weatherboard products offer a range of unique seamless and easy to use systems for installation. The wide selection of styles and finishes will complement any project design.

Natural Now Platinum Greentag cert™ certified, our natural boards are a totally unique product. The natural board provides an organic appearance, with the characteristics of raw, undressed timber. It can be left to weather or stained to produce a range of colours and styles.

Architectural Panels Weathertex provides the largest Architectural Panelling available in Australia. Lightweight and durable the panels are quick and easy to install, making them perfect for large multi-res or commercial jobs.

CEMINTEL®

Cemintel offer engineered systems around prefinished solutions that enhance performance and aesthetics, as well as traditional internal lining products.

Through innovation and intelligence with cement panels and what we do with them, we are creating products, systems and services that inspire, giving choice and real design flexibility to create striking points of difference.

Compressed Sheet

Barestone

Commercial Express Panel

Compressed Sheet Cemintel Compressed Sheets are tried and tested for proven long term strength. Designed for use in tough conditions, including wet area flooring and decking, the panels can be covered in tiles and other floor coverings.

Constructafloor Cemintel Constructafloor is a nailable, advanced lightweight, fibre cement structural flooring product available in two options: internal or external. Panels have a tongue and groove joint, which keeps stability between joists and reduces the risk of membrane cracking. As the product is nailable, installation is faster as no countersinking is required.

Texture Base Commonly referred to as 'Blueboard', Texture Base Sheet provides a substrate for a smooth, monolithic surface when utilising textured finishes. The products are generally used as a lightweight solution for second storey residential wraps on the ground with rendered masonry.

Barestone An Australian Original, Cemintel Barestone™ External prefinished panels provide a raw, contemporary finish for an external application. Its biophilic impression enhances design aesthetics, as it weathers naturally and seamlessly blends into its environment. Barestone™ External can be used in many diverse ways and cut to different shapes and sizes for dramatic design effect.

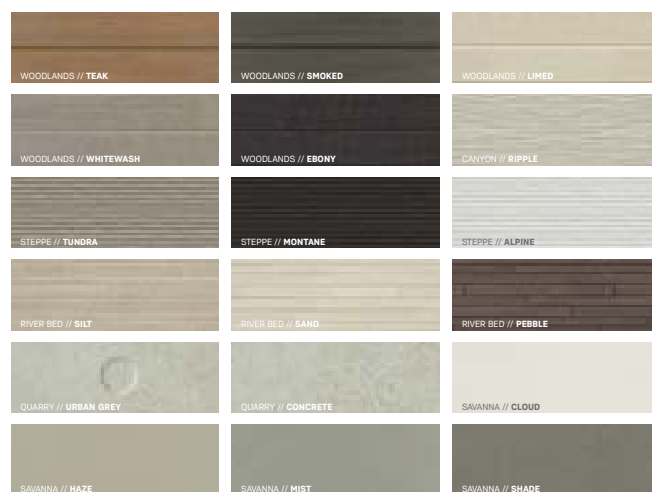

Commercial Expresspanel In conjunction with the Commercial ExpressWall system, it combines a modern, express jointed aesthetic with a fast and economical top hat installation system. With pre-primed, multiple sized sheets available, panels can be arranged in a variety of patterns. With great impact resistance and strength, these 9mm compressed panels can be used in applications required to withstand high wind loadings, including cyclonic conditions.

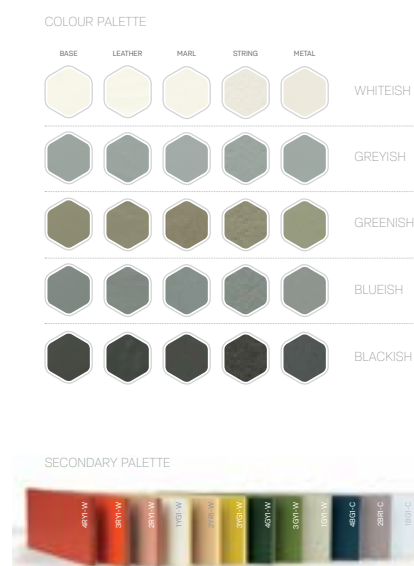

Ceminseal Wallboard CeminSeal Wallboard is manufactured in Australia and uses Cemintel's unique CeminSeal water block technology, repelling water, increasing paint adhesion and aiding moisture management in the places that can't be seen. It is applied to the face of the panel and has been tested to show higher water resistance when compared to wet area plasterboard and other products on the market. The smooth finish of CeminSeal Wallboard means less work for fixing and setting and provides a smooth paint surface when not tiled over.

Territory Cemintel Territory is a natural cladding range that comes from Japanese values of simplicity, nature and quality. It is a building block to your home style. The prefinished cladding panels simulate materials like stone, timber, concrete, metal, tiles and smooth render in a sophisticated way to enhance building façades without the ongoing maintenance requirements.

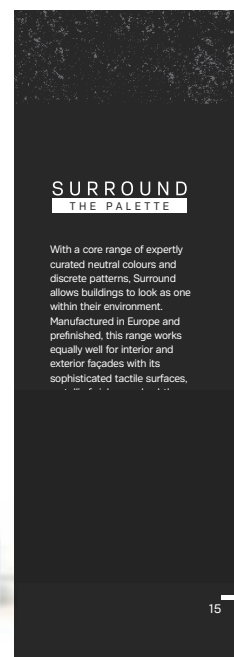

Surround A European manufactured, prefinished range that is expertly put together so that you can mix and match colours with confidence. Surround is a core range of neutrals and discrete patterns for buildings to look at one with their environment, taking references from the landscape and streetscape

- Scratch Resistant Face
- Smooth White Surface

Soundscapes Ceilings Design unique layouts with a palette of standard colours, or specify a custom colour. Define spaces and create quieter areas in your own innovative configurations.

SOUNDSCAPES Shapes is a designer acoustic panel, pre-formed into a convex, concave, square, circle, hexagon, trapezoid, or parallelogram shape.

Define your interior space with SOUNDSCAPES® Baffles, which feature a sleek, linear design combined with excellent sound absorption, making it the ideal solution for noisy environments.

With SOUNDSCAPES Baffles Curves, you can now create exciting interiors without compromising acoustic performance. Get all the benefits of traditional rectangular baffles, with a unique waveform edge that creates a fresh and calming visual.

Metalworks Metal Ceiling Tiles

You'll find the industry's broadest range of metal ceiling solutions in curves, clouds, baffles, panels, and planks in standard, custom, or one-of-a-kind looks to meet both your design and functional needs.

Along with design flexibility and durability, ARMSTRONG METALWORKS metal ceilings deliver strong acoustic performance. Metal ceiling tiles are available in a range of perforation choices and colours- from standard to custom to provide an impressive visual impact and to satisfy your unique acoustical needs.

Metalworks Baffles Create exciting linear visuals with Armstrong MetalWorks® Baffles. Contemporary, Sophisticated and Industrial designs are easily achieved with METALWORKS® Mesh. Select from Lay In or Hook On ceiling panel options and bring your floating cloud or full ceiling design concept to life.

Woodworks Bring a little nature inside with the warmth and beauty of WoodWorks wood ceilings. Combine the beauty of natural wood in a versatile line of panels, planks, clouds, and canopies available in standard, custom, and one-of-a-kind options.

WoodWorks ceilings are an excellent alternative to custom millwork that can prove to be unreliable, drive up project costs, and result in project delays. Offered in a variety of perforations and finishes - from real wood veneers to exotic species, WoodWorks ceilings offer many options to reflect your design intent.

Woodworks Linear Panels

WOODWORKS™ LAY IN AND VECTOR

Armstrong has harnessed the enduring, natural beauty of wood in a range of ceiling panels, combining functionality with elegance and wide range of choice.

WOODWORKS™ GRILLE - Tegular Warm, natural wood ceiling panels create dramatic lines adding a unique perspective to your design.

easycraft.

EasyCraft manufacture a stunning range of decorative wall and ceiling linings, all of which are DIY friendly and offer both modern and traditional styles to reinvigorate any home.

- Hidden tongue and groove easyjoin system
- Comes pre-primed for faster easier installation
- High impact resistance, 300% tougher than plasterboard
- Consistent board surface, no knot holes, splitting or splinters
- Made in Australia using all Australian grown species
- Made from MR MDF

EasyVJ Our most popular wall and ceiling feature panel, easyvj makes a great impression in both traditional and contemporary homes

- EasyVJ profile with 100 & 150mm spacing options

EasyGROOVE Innovative and individual: this modern, open profile design offers wonderful flexibility, with various optional centre width spacings

- EasyGROOVE profile with 150, 300mm & random spacing options

EasyRegency The bold vertical lines of easyregency look equally at home in a traditional residence or as an eye-catching feature in a modern one

- EasyREGENCY profile with 150mm groove spacings options

EasyVeneer The durable, decorative solution to creating feature walls or ceilings with the classic warmth of timber.

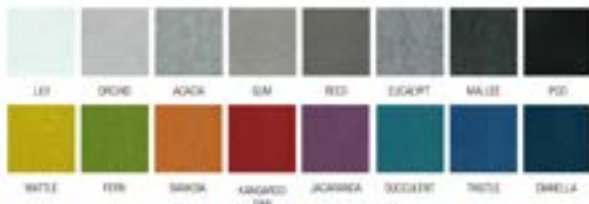

- Five distinct veneer finishes to choose from
- Available with EasyGROOVE decorative profiles
- Option to finish raw or with a clear lacquer

HIMMEL™

INTERIOR SYSTEMS

CSR Himmel Interior Systems are the leading Australian brand in aesthetic and acoustic interior solutions for Australian Buildings.

Ambience CSR Himmel Interior Systems are excited to launch Ambience by Himmel. This decorative acoustic collection is available in 16 beautiful colours across six unique product ranges. Made in Australia, the Ambience collection reflects the best of design and functionality with cool shapes and great acoustic properties. An ambient room is created by both the visual and acoustic effects within an environment, where a comfortable, romantic, fun or lively space can only be achieved by the level of ambience that is established.

Austratus Austratus is a Timber Batten Ceiling and Wall System designed to be easily installed to bring natural warmth through timber to any commercial space. Available in both Western Red Cedar and Austratus Timber, this product range offers design flexibility with a variety of batten sizes.

Castellation Cedar Sales Castellation is a distinctive and contemporary profile that complements design trends in commercial spaces. The Castellation Series achieves the look of timber battens in an easy to install system in the natural beauty of Western Red Cedar and Hemlock. Two different profiles, Castellation and Castellation Screenclad offer a versatile look and feel to internal timber cladding.

Castellation Screenclad Castellation Screenclad Interior Cladding offers a modern timber batten look in an easy to install tongue and groove system. Manufactured from gorgeous Western Red Cedar Timber, this profile is available in five different colours. Castellation Screenclad offers design flexibility and a contemporary look that is suitable for any interior application.

Bostik provides adhesive technologies across a wide range of sectors including DIV & trade, construction, industrial, automotive, and transport.

Tile Adhesive

At Bostik, we offer a comprehensive system of tile adhesives for professional tilers, specifiers and architects, as well as DIYers. Our range covers ceramic tile adhesive, porcelain tile adhesive, natural stone tile adhesive and mosaic tile adhesive. Plus we have products for preparation, including

Ecofix Ecofix is a rigid set, cement based adhesive suitable for most types of ceramic wall and floor tiles including monocottura, slate, quarry tiles, terracotta and natural stone. Ecofix is suitable for thin and thick bed applications onto rigid substrate, including concrete, cement render, brickwork and blockwork.

Ultra Mastik Ultra Mastik is premium tile adhesive with superb bond on 600mm x 600mm tiles. Smooth feel for easy trowelling. It is a flexible powdered adhesive which is suitable for commercial, high traffic areas, external and internal tiling.

Superfixall Superfixall is an exceptionally high strength cement based adhesive developed to bond all types of ceramic tiles. Ideal for bonding monocottura and fully vitrified tiles, as well as natural stone, marble, granite and mosaic tiles onto brickwork, cement render and concrete walls and floors.

Bostik Tile Grout Bostik Dry Tile Grout is a special formulated colour grout for filling joints between tiles and natural stone. It is made by select grades of UV stable pigments, proprietary additives and polymers, portland cement and graded aggregates as in the case of tile joint filler (sanded colour grout).

Excelflex Excelflex is a high strength powdered adhesive for wall and floor applications. Suitable to use over concrete, cement render, screeds, fibrous cement sheeting and Bostik approved waterproof membranes. Excelflex is recommended for all internal and external applications. Excelflex MY is suitable for all types of tiles.

Bostik Designer Grout Designer Grout is an excellent commercial grade tile grout. It is very easy to clean up and has superb working properties which means less mess, less waste and a better finish. It is also available in a wide range of designer colours.

Silicones

Fill A Gap Fill-A-Gap is a general purpose one-part water based, paintable acrylic gap filler. This is easy to use, economical sealant provides excellent adhesion for gaps and low movement joints.

Kitchen & Bathroom

Kitchen & Bathroom Neutral is designed to seal in wet areas, such as bathroom and kitchen fixtures, bathtubs, showers, screens, tiles, rimless sinks and toilet pans. It is suited to interior surfaces in residential or commercial applications.

Roof & Gutter

Bostik Roof & Gutter is a premium one component, mid flex, neutral curing 100% silicone roof sealant, which provides excellent adhesion to many common substrates in plumbing and roofing applications.

Fireban One ACRYLIC

Bostik Fireban Acrylic is a single component, non-sag, fire rated acrylic based gunnable sealant. A general purpose product for construction joints and the sealing of service penetrations in plasterboard, concrete floors and masonry wall constructions

Fireban One Bostik Fireban One is a fire rated intumescent, low modulus, one component, and Class A polyurethane sealant. When cured it will form a tough, flexible fire rated seal capable of cyclic expansion and compression movement of 50% of the original installed joint width.

Seal N Flex 1 Bostik Seal "N" Flex 1 is a low modulus, one component, Class-A polyurethane sealant. When cured it will form a tough and flexible seal capable of cyclic expansion and compression movement of 100% of the original installed joint width.

Waterproofing

Trade Water Proof

Membrane ASA Trade WPM is a single component water-based polyurethane, Class 3 waterproofing membrane system that meets the requirements of AS3740 by complying with AS/NZ 4858. It is

Bostik Dampfix Gold

Dampfix Gold is a one part, highly elastic, Class 3, water-based polyurethane, BRANZ appraised waterproofing membrane system. It is

specifically formulated for application on graded substrates that provide positive falls to drainage outlets. This is

Adhesives

ultraset 3-in-1 Bostik Ultraset 3 in 1 is a high performance adhesive, moisture control, and sound reduction membrane all in one. Bostik's breakthrough AXIOS Tri-Linking Polymer Technology is used in this formulation, maintaining the superior long term durability, moisture control and sound abatement properties of high end urethane

Floor Levelling

UL100 Superior underlayment for carpet and ceramic tiles (may be used under parquet, timber & vinyl after extended curing).

UL200 Superior vinyl & timber underlay. Rapid hardening polymer modified cementitious underlay formulated for maximum flow without shrinkage or cracking. Receives overlays within 1-2 days depending on overlay material.

Commercial Office bathrooms should combine elements of contemporary style whilst remaining functional. Durability, comfort and privacy should be at the forefront when specifying office bathrooms however they should also be low maintenance and use minimal amounts of water. The following bathroom packages have been designed with these features in mind.

Healthcare In a busy hospital or healthcare centre, bathrooms must be high performance and technologically advanced. The products used must be durable, hygienic, comfortable and easy to clean and service. Where possible, they should also maintain a sense of residential domesticity, for added patient comfort. The following selections deliver all of the above without compromising on style and design.

Britex is Australia's premier manufacturer and supplier of stainless steel products for commercial building projects.

Britex Education Education products are designed according to the specification guidelines set out by state education departments. Where a state's Department of Education specification document outlines a unique design that differs from other states, this has been noted. Education products are generally vandal resistant, functional, hard wearing, easy to maintain and incorporate numerous unique safety features.

Britex Security These products have been selected as the fixtures most suitable for security projects in that they are highly resistant to deliberate acts of force, tamper resistant and are, in many cases, free of ligature points. Common features of these designs include fully enclosed plumbing connections, entirely welded constructions and low profile or timed flow tapware options.

Britex Health Science Britex has developed this product range over many years spent in close consultation with Australia's premier Health / Science design Architects. Included in this range are specially designed benches, troughs, basins, flushing sinks and waste disposal fixtures. They are designed to meet the strict documented guidelines set out by Health Professionals for their unique intended use. For this reason, Britex products are consistently selected by designers for inclusion in Australia's finest hospitals, research institutes and medical facilities.

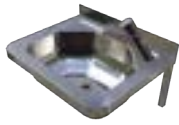

Britex Public Amenities Britex understands the importance of incorporating vandal resistant, low-maintenance, water efficient products into public amenity designs without compromising on aesthetics. These products are all robust, hard wearing, easy to maintain and can be found all over Australia in sports stadiums, entertainment venues, pubs, clubs, train stations and public toilet blocks.

polytec

Everyday Materials Polytec Everyday materials are created to help make your installation process a breeze with the highest quality products. No matter what your need polytec Everyday materials will have you covered with interior carcass board, a wide range of raw EO MDF board, laminated kickboards, and vinyl wrapped drawers are perfect for all areas that may be exposed to light moisture.

Polytec Carcass board comes in a wide range of sheet sizes, thicknesses and options. From pre edged shelving for wardrobes and cupboards to high quality MDF perfect for machining, your interiors will stand the test of time with polytec Carcass board.

Benchtops and Laminate Polytec's BENCHTOPS & laminate range is peerless. There's no less than 120 realistic stone prints and neutral solid colours in polytec's BENCHTOPS & laminate range in concert with the compelling timber inspired RAVINE range.

A distinguishing feature of polytec's BENCHTOPS & laminate is the exceptional colour depth and clarity that's achieved, which is akin to natural materials.

Polytec BENCHTOPS & laminate encapsulate stylish and affordable luxury for differing individual budgets and aesthetic inclinations, befitting the Australian lifestyle.

Melamine Panels A seductive variety of timeless neutral colours and decorative finishes are offered in the polytec MELAMINE panels range. Choices include: Texture, Matt, Ashgrain, Finegrain and Sheen. These panels are also designed to mix, match and contrast with polytec's vast BENCHTOPS & laminate colour range.

Woodmatt Polytec's core palette collection has expanded with the addition of WOODMATT, a new range of 12 tactile woodgrain prints, setting a new benchmark for standard laminates and melamines.

Combining the best of natural timber with technology advancements, the matt finished subtle woodgrain embossing - is designed to match perceptions of authentic timber veneer - in look, feel and warmth.

Compact Laminate

Polytec's COMPACT laminate ticks a raft of boxes.

As the consummate long-lasting, low-maintenance, decorative panel, polytec's COMPACT laminate is a go-to product for the most demanding professional interior and external joinery environments.

Manufactured from quality materials embeds polytec's COMPACT laminate with excellent technical characteristics. It's totally impervious to water and has outstanding impact, stain and wear resistance, along with excellent hygienic properties.

Steccawood STECCAWOOD provides a warm and rich texture appearance for a wide variety of panelling, ideal for wall and ceiling applications in either a vertical or horizontal setout, STECCAWOOD prefinished decorative battens create strong directional lines that will add a striking feature to any internal commercial space. Made from E-Zero MDF and wrapped in decorative overlay STECCAWOOD battens impart the realism, warmth and character of timber, providing a durable and cost effective solution.

THE ULTIMATE
FLOORING EXPERIENCE

Tarkett has been leading the way in commercial and residential flooring solutions for over 100 years, specialising in designing, manufacturing and distributing floor covering solutions all over the world.

Homogeneous Vinyl Flooring Tarkett vinyl flooring is tough and ultra-durable, ideal for heavy and very heavy traffic areas, such as healthcare and education. These resilient floors are known for their durability, damage resistance and ease of cleaning.

Vylon Plus With a classic soft pattern in 30 colourways across sheets and tiles, Vylon Plus is a multi-purpose homogenous vinyl floor with excellent value for money. Ideal for heavy traffic commercial areas such as schools, shops or healthcare facilities, its factory-applied acrylic finish requires no initial wax or polishes and makes the gloss level adjusted by polishing.

Primo Premium Primo Premium is a Homogeneous compact floor vinyl. Primo Premium is ideal for extra heavy duty commercial and industrial areas.

PRIMO SAFET Primo combines best-in-class performance with low-cost maintenance to deliver an ideal solution for commercial and wet areas. It provides a confident grip for bare feet and reduces the risk of slipping, even when covered with soap and water.

IQ RANGE Designed for education and healthcare facilities, iQ Granit offers outstanding performance with the best life cycle costs on the market. With its classic functional design featuring subtle directional pattern, it spans across an incredibly broad palette of 50 colours. This flexible vinyl floor can be easily matched to fit your school or hospital, while being extremely durable as well as superior wear, stain and abrasion resistance for all heavy-traffic areas. No need for polish or wax, a simple dry-buffing is enough to restore this floor's original appearance. Thanks to a range of formats and coordinated accessories - including acoustic, anti-static and slip-resistant flooring options - iQ Granit is a genuine multi-solution offer.

Wall Protection

WALLGUARD Wallgard wallcovering is the perfect solution for areas that need special wall protection, such as wetrooms, clean rooms and light industrial environments. A PU-shield treatment provides high resistance against stains and chemicals and the smooth impervious surface delivers optimal hygiene and watertightness.

Heterogeneous Vinyl Flooring

Compact heterogeneous vinyl flooring is a versatile and creative solution for all types of applications. It comes in different constructions, such as sheet and tile, to accommodate the use in residential or commercial applications, particularly in high traffic areas such as schools and hospitals.

METEOR 55 Meteor 55 is a compact Heterogeneous vinyl flooring that offers the perfect alternative when a budget solution is needed, without compromising on design or comfort.

RUBY 70 Acczent Excellence 70 Ruby is a cost-effective Heterogeneous vinyl with premium qualities. Treated with our trademarked Top Clean XP surface protection for extreme durability and cost-effective maintenance.

Luxury Vinyl Tiles

Floor is the new playground with luxury vinyl tiles. Produced in both tile and plank format across a range of patterns, colours and styles, they offer endless layout possibilities thanks to their modular format. Luxury vinyl tiles come in several installation options: glue-down for heavy traffic, loose-lay for quick renovation and click system for floating installation. Treated with our Top Clean surface protection for easy maintenance and extra resistance to scuffs, scratches and stains. LVT is ideal for applications where you want to leave a lasting impression, whether it be in commercial, industrial or retail.

ID ESSENTIAL 30 With limitless combinations to customise your home, iD Essential 30 vinyl planks can take your interior decoration to the next level. Treated with our Top Clean surface protection for easy maintenance and extra resistance to scuffs, scratches and stains. Available in 12 oak look patterns, iD Essential 30 offers great design options at an affordable price point.

ID INSPIRATION 70 With endless possible combinations to customise your floor, iD Inspiration 70 vinyl planks are available in 12 wood designs to let you create spaces that are stylish and modern.

Built to last, iD Inspiration 70's 4-layer construction includes thick scratch, wear and indentation resistant top layers. A fibre glass reinforced base provides protection against tearing. Perfect for retail, hospitality, workplace or any other commercial environments with moderate to high traffic.

ID INSPIRATION LOOSE LAY

iD Inspiration Loose Lay collection combines design and performance in one product that is easy to install and maintain. It comes with patented anti-skid backing prevents sliding in all directions and provides strong plank adherence letting you mix and match from a wealth of great designs from distressed beach woods, to sawn-worn oaks and christmas pines. iD Inspiration Loose-lay vinyl floors can be easily combined to create stunning layouts.

Tandus Centiva

A Tarkett Company

The Tandus carpet tile range features 100% solution dyed nylon pile with a variety of backings to provide the best combination of aesthetics, performance and sustainability for your project.

SENSE Classy contemporary patterns that provide an elegant framework for any modern interior. Featuring subtly textured linear patterns in a neutral colour palette that allows creative flexibility to complement and create a wonderful aesthetic in a variety of installation patterns.

DESSO

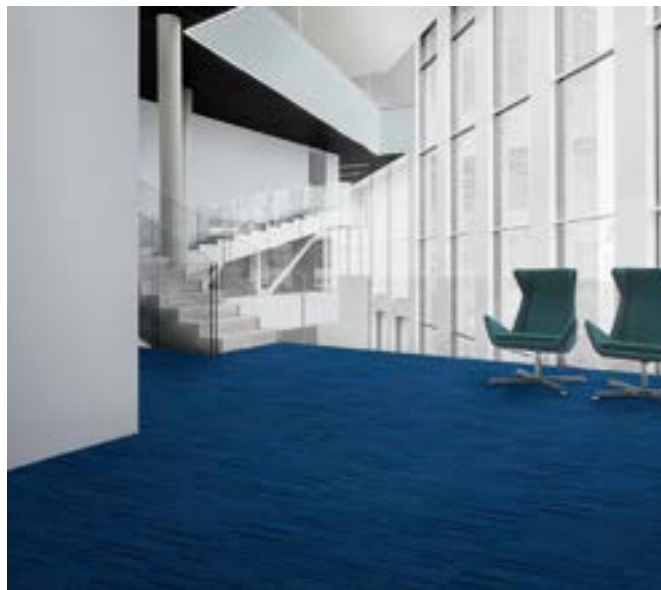

A Tarkett Company

Desso delivers unique, innovative and functional carpet and carpet tiles across various sectors, including workplace, healthcare, education, retail and more. Now available through Tarkett.

ESSENCE A professional, smart looking tile, Essence Plain is designed to seamlessly combine with the rest of the Essence Collection – Stripe, Structure or Maze, providing unprecedented creative design opportunities.

AIRMASTER The AirMaster® range includes a unique range of designs to suit your project requirements. From linear designs, to those with a more organic and textured look, Desso AirMaster® is available in Sphere, Desert, Earth & Tones.

IMAGERY II Featuring a medium scale pattern mixing vertical lines with geometric blocks, Imagery II delivers the best combination of aesthetics, performance and sustainability.

STRUCTAflor® TERMIfloor® is termite protected structural grade particleboard sheet flooring, providing cost-effective long-term defence against termite damage. Protected against termite damage – treated in accordance with Australian Standards

STRUCTAflor® TERMIfloor® has a Red coloured edge wax to identify floor type.

STRUCTAflor® TERMIfloor® has unique colour-coded tongues to identify thickness;

Yellow Tongue - 19mm for joist centres up to 450mm

Red Tongue - 22mm for joist centres up to 600mm

Blue Tongue - 25mm heavy duty for joist centres up to 600mm

- Inbuilt moisture protection
- Wax impregnated throughout
- Edge wax coated
- No need to seal uncut edges

Produced in Australia from sustainably grown Australian plantation pine Manufactured from Australian plantation pine

Applications and Benefits The Structaflor range is ideal for sub-floors, suspended floors in multi-storey construction, alterations, additions and commercial applications. Use for timber sub-floor and mid-floor systems provides advantages including:

- Reduced site impact as there is less need for bulk site excavation, earth retaining walls and special drainage
- Easier construction for split level and double storey designs
- Greater adaptability for later extensions or alterations
- Simple, economical installation of central heating, plumbing and electrical wiring
- Underfloor space for storage and water tanks
- Flexibility to choose from a variety of floor coverings

Thermal Insulation The thermal conductivity of STRUCTAflor® is 0.12W/mK. Thermal resistance (R-values) calculated in accordance with the relevant provisions of Australian Standard AS/NZS4589.1 for the nominated thicknesses are:

- Yellow Tongue 19mm R0.16
- Red Tongue 22mm R0.18
- Blue Tongue 25mm R0.21

QUALITY. GUARANTEED.

MML tiles grace the walls and floors of residential homes and commercial spaces in over 80 countries around the world. Over the years, the brand has received nods for a number of prestigious architectural projects.

It's time to celebrate new spaces by transforming the mundane into a new dimension. Where every size of tile we have is made with extraordinary attention to detail. Large, medium or small, whatever your size preference is, the winning look is just a tile away.

CASTLE – Modern Minimalism Drawing its inspiration from the monochrome finishing of soft cement surfaces, CASTLE provides the ideal canvas to create a modern and minimalistic space. The understated facade of CASTLE comes in four basic colours of white, brown, light grey and dark grey.

TIMBERTECH Wield the power of wood with TIMBERTECH by MML. From warm brown and gentle ash to iridescent ivory and compelling charcoal tones – this range delivers versatility and comfort in just the right colour, texture, and finish to capture that perfect mood.

BLUSTONE Indulge in timeless surfaces, and neutral shades of browns and greys with BLUSTONE tiles by MML, reminiscent of the natural smoothness of stone, to beautifully adorn every space.

SANCTUARY A harmonious blend to all spaces, the clean and sleek SANCTUARY tiles by MML, offers a charming selection of glossy sheen, smooth waves and delicate lines to grace your walls. Dazzle your crowd with SANCTUARY, radiating in an understated sense of sophistication.

SAYLEE Natural stone interior look reaches new heights with the speckled stone elegance of SAYLEE. In shades of white, cream and greys, SAYLEE is the 6th of the 7 mashable tile series from the MML® STYLE MAKER collection. Getting that classic look, or that minimalist look, or that modern look for your home or work spaces is a simple with MML® STYLE MAKER's easy tile combinations.

ALISTA Designed for the minimalist who would like to infuse a touch nature into their surroundings, ALISTA introduces three different concepts of minimalism - Contemporary Minimalism, Natural Minimalism, Weathered Minimalism.

COSMO The COSMO collection adorns your spaces with the well-loved mosaic design of Terrazzo, minus the colourful chips of conventional Terrazzo. Adding a delightful hint of nostalgia to your ambiances with a modern achromatic finish, COSMO is rich in design yet pleasing in neutral hues of white and greys.

SKINROCK®

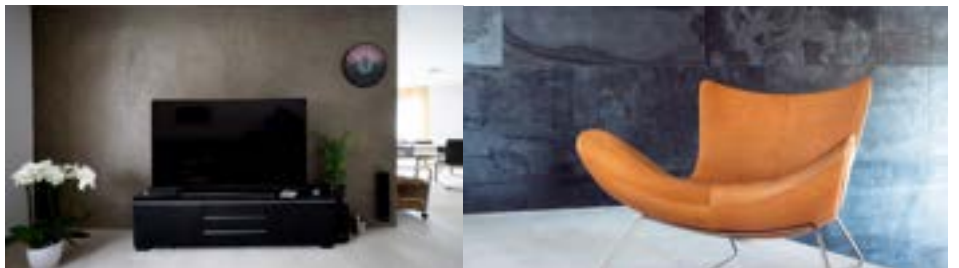

created in switzerland

Skinrock is a natural stone, slate or quartz panel, used for decorative applications.

Skinrock consists of a split-off layer of natural slate or quartzite and a polyester backing with glass fiber for strength and to ensure dimensional stability. The natural stone with its natural colours makes every square inch a one of its kind.

This opens up new, unlimited opportunities on almost all surfaces. Available in 17 different decors, in natural slate and quartzite, elegant silver tones to green, grey and black shades.

Sinrock sheets are extremely lightweight and can be installed on almost any surface. This opens up new, unlimited opportunities to create the ambience of natural stone on drywall, wood, metal, fiberglass, ceramic and concrete. We currently offer 17 different versions in natural slate and quartzite ranging from elegant silver tones to green, grey and black shades.

Axiom are Australia’s expert balustrade consultants and suppliers of architectural glazing systems to leading architects, installers and builders in the industry.

Balustrade Systems Combining architectural flair and installation practicality the AxiLume range has exceeded expectations in the industry and beyond.

Frameless Within the Frameless range there are many examples of the design flair of the Axiom Group. Using glazing channels and standoff fittings, the frameless range indicates just how many options are available within the AxiLume range to achieve the look your project demands.

Metropolis Frameless

Clearview Fully Framed

With the Clearveiv fully framed Vista Suite, Axiom supplies a pre-glazed, powder coated, and assembled balustrade system that clips together and bolts down. The Vista suite can be adapted to use a wide range of handrails available.

Clearview Fully Framed

Semi-Frameless

The Semi-frameless range within the AxiLume range is the epitome of cutting edge design and engineering capacity. With a range of posts and handrails to choose from and an exposed bottom glass edge, the deck or balcony area in which it is placed will become a minimalist attraction in the project.

Neo Semi-Frameless

Non-Glazed

In today’s ever evolving architectural landscape, it is important options are available to designers and builders. With the Non-Glazed balustrade systems there is options of baluster styles and mesh infill systems. With build-ability and time saving front of mind, our designers have excelled in producing pre-assembled Non-Glazed suites.

Settler Suite

LOUVRECLAD®

Commercial Louvres & Screens - Louvreclad helps to create remarkable building exteriors through leading external ventilation louvres & aluminium cladding. As a respected industry leader, we work with specifiers, builders and trade subcontractors to deliver enduring external Louvre and cladding results that impress clients and stakeholders alike. We believe in making it easier at every touch point so our specialist team injects expertise at every step – from initial design and planning right through to installation or delivery.

Ascot Series Aluminium Louvres

Louvreclad's Ascot Series® aluminium louvres offers a variety of screening solutions for commercial and high rise residential projects. With a robust frame, your choice of widths and single-trade installation, The Ascot Series® can be made into various panel shapes. It features an open channel perimeter extrusion.

Altura Series Chevron Louvres

Designed with high performance in mind, the Altura Series has been created for commercial plant room enclosures where zero vision, maximum airflow and maximum rain defence are crucial. This high performance louvre not only ensures the mechanical equipment is hidden from view, but also provides an aesthetically pleasing architectural feature.

Barossa Series Aluminium RHS

Louvreclad's Barossa Series® fixed aluminium RHS battens are a striking contemporary alternative to traditional timber battens. Barossa's superior aluminium durability also ensures a high quality solution for distinctive features, privacy and sun screening applications.

Caprice Series Aluminium Louvres

The Louvreclad Caprice Series® screens is available in various widths and ellipsoid, bullet or panel configurations, which can obtain dramatic effects in contemporary architectural panels and seamless finishes to building exteriors. In contrast to traditional sunblades and fins, the Caprice Series® aluminium louvre system requires only a single-trade installation, thus ensuring genuine cost benefits.

Jupiter Series Single, Two-stage & Drainable Louvres

Louvreclad's Jupiter Series® louvres feature an extruded aluminium fixed louvre which is ideal for commercial and industrial applications. The Jupiter Series® has a host of options which include fixed, single, two-stage or drainable louvres.

Merlin Series Elliptical Louvres

Louvreclad's Merlin Series elliptical louvres provides the ultimate in spanning and cantilevering capabilities. It's unique 450mm width enables blade spans of over 4 metres which can be of paramount importance in bespoke architectural features. Designers can mount this blade in various configurations of vertical or horizontal. The Merlin Series elliptical louvres offers a striking solution for building refurbishments and building facades.

Polaris Series Perforated Metal Screens

Louvreclad's custom designed Polaris Series® inclusion of perforated metal screens can create a striking feature on the external building envelope. Featuring preferred degrees of filtered natural light and vision, the Polaris Series® is a perforated screen system which combines functionality and design properties. Ideal for building renovations, high impact company branding, or simply enhancing your building aesthetics, the Polaris Series® has unending possibilities.

Venus Series Chevron Louvre

Louvreclad's Venus Series® is a single stage full chevron louvre system, ideal for plant screening applications, privacy blocking and security screening.

Wickham Series Elliptical Louvres

Louvreclad's Wickham Series® elliptical louvres is another ideal screening solution for architectural sun screening on buildings. An ellipsoid blade which has high impact resistance, making it one of the most long lasting and durable designs on the market. Capable of spanning over three metres makes it an ideal low maintenance solution for a variety of commercial applications. This could include student accommodation, apartments or aged care facilities.

Clear Vision

SuperClear Whether you want flawless colour for a glass feature, or simply the clearest view of outside, SuperClear will deliver you the very best look.

SuperClear eliminates the subtle green tint that usually comes with glass, and offers an almost invisible barrier between you and the world.

VTough Why settle for ordinary glass when there's a tougher option available? VTough offers a total glass solution that allows greater scope in your design.

Five times stronger than ordinary glass, VTough is perfectly suited to a wide range of applications that would normally put ordinary glass at risk of breaking. This includes splashbacks, basketball backboards and lots more. Think of the possibilities!

We are the largest glass supplier and only manufacturer in Australia. We continue our passion for glass by leading the industry for quality and innovation. Our vision? To help people use glass in extraordinary ways in the places we live, work and play.

Core Products

VFloat Start your journey to brighter, more visually spectacular designs with VFloat.

VFloat is the starting point in our range of Australian-made glass products. It may be our base range, but it's anything but basic. Made using the float process – the benchmark for glass of quality and optical clarity – you can be assured that VFloat will make a great contribution to your space.

VLam There's all kinds of specialist glass products out there, but sometimes you just want the best of everything. That's why we created VLam to be the starting point for safety, security, UV protection, noise reduction and – well, anything you want.

VLam offers everything you could need in a glass product for your space, as well as range of custom options. The range is a durable, adaptable, high performance glass solution that's suitable for almost anything you can imagine.

Energy Efficiency

ComfortPlus Whatever the weather outside, you should be able to enjoy the view without feeling the summer heat or winter chill. That's why we designed our ComfortPlus range to keep you feeling comfortable no matter the season.

ComfortPlus is Australasia's leading Low E performance laminate, suitable for both commercial and residential applications and available in a contemporary and comprehensive range of tones.

EnergyTech & SolTech

If you want to bathe your space in natural light but still control the temperature within – then look no further than our EnergyTech and SolTech range.

Both these products were specifically designed for Australian conditions and use enhanced solar control to keep buildings cooler in summer and warmer in winter. So you can open your space in natural light without compromising on comfort.

Noise

Vlam Hush When you live in a busy urban environment, it can be hard at times to drown out the noise around you and really unwind. VLam Hush delivers the quaint seclusion of country living, without moving an inch.

You'd think that to block out the outside commotion, you'd have to have horrible thick windows that would make you feel closed in. But VLam Hush is a thinner, lighter solution to help you stay connected with your surroundings, without all the racket.

Security

AssaultGuard There's nothing more important than knowing you're safe. Most people think that a high level of security would mean compromising on the open and inviting look of your space – but not with AssaultGuard.

AssaultGuard delivers the beautiful aesthetic of glass, while still offering a strong and affordable barrier against forced entry. Resisting attacks from hand tools like crowbars and hammers, you can count on AssaultGuard to be tougher than intruders.

JailGuard

As the name suggests, JailGuard is specialised security glass that is tough enough to meet the standards of correctional facilities.

JailGuard is designed to resist attacks from all the typical hand tools that might be found within correctional facilities such as police stations, jails, remand centres and more.

Decorative Products Luxury Paints offers interior and exterior paints in a wide range of gloss levels and colour ranges. All products are manufactured to a premium quality, are easy to use, long lasting and tested specifically for the Australian climate.

Speedprep Sealer Primer Undercoat

Speedprep Sealer Primer Undercoat is a premium quality water based sealer, primer and undercoat designed for interior and exterior use. Speedprep Sealer Primer Undercoat can be recoated with either Luxury Paints water or oil based topcoats.

Multi Purpose Undercoat

Multi Purpose Undercoat is a premium quality oil based interior/ exterior primer and undercoat with excellent filling and sanding properties. It provides superior gloss retention for further topcoats. Can be recoated with either Luxury Paints water or oil based topcoats.

Non Drip Ceiling White Non Drip Ceiling White is a premium quality, interior flat ceiling paint designed with outstanding hiding power. The special 'non drip' formulation enables ease of application with minimal amount of splatter.

Sunshield Low Sheen Sunshield Low Sheen is a premium quality, high opacity low sheen paint finish designed for interior/exterior areas such as pergolas, outdoor furniture, fences etc.

Easiclean Silk Low Sheen

Easiclean Silk Low Sheen is a premium quality, washable silk finish designed for interior walls and ceilings. It is also suitable for use in wet areas.

Gloss Enamel

Gloss Enamel is a premium quality interior/exterior enamel that has superior durability, gloss and colour retention. It provides a durable, high gloss finish on doors, trims etc wherever a hard wearing and washable finish is required. It is ideal for use in high traffic areas and wet areas.

Industrial products

The Superlux Industrial range was introduced to meet the demands of the general fabrication industry. Luxury Paints have now become a leading supplier to this industry. In this section you will find a full range of products including Quick Drying Spraying Enamels, 2PK finishes, Hammer finishes and Metal Primers.

Easi Spray Metal Primer Easi Spray Metal Primer is based on tough alkyd resin and zinc phosphate that impart good anti corrosive properties on steel. Suitable for agricultural parts, earthmoving equipment, structural steel, switchboards and production line painting. Normally over-coated with conventional air drying spraying enamels such as Superlux Industrial QDR range.

Xtreme Enamel Xtreme Enamel is a high gloss and quick drying enamel having very good flexibility, water and petrol resistance. Suitable for use on agricultural implements, general machinery and earthmoving equipment.

Specialty Products Modern trends and technology have enabled Luxury Paints to research and develop revolutionary products such as their Coolit Ceram Liquid Thermal Insulation Coating system and Graffiti Buster 200. Luxury Paints endeavours to become market leaders in the area of specialty coatings and is continually updating and expanding its product range to satisfy the growing demand of Australian and International market.

Coolit Ceram All Metal Primer Coolit Ceram All Metal Primer is designed to be top-coated with the Coolit Ceram Colour coatings for heat minimisation mainly on metal roofs and metal wall cladding; but can be used where-ever ambient heat build-up minimisation on external metal surfaces is required.

Coolit Ceram Colours The cutting-edge technology used in the Coolit Ceram colours permits significantly lower heat ingress to penetrate the under-roof space which then radiates through into the living/working spaces of homes and buildings while maintaining maximum durability and service life of the roof coating and the actual roofing material.

Graffiti Buster 200 Graffiti Buster 200 is a two pack water based clear anti graffiti coating designed for the protection of stone, brick, concrete and previously painted timber and metal substrates. Graffiti Buster 200 is classified within the "permanent type" of anti graffiti coatings as it withstands repeated graffiti cleaning cycles before re-application is required.

Timber products The Luxury Paints Timber Range expanded in 2002, catering for the growing market of clear exterior coatings to supplement their range of interior coatings. The exterior timber products range includes water based and solvent based systems, while the interior timber range has hard wearing, attractive solvent based finishes.

Acrylic Timberclear Tuff Acrylic Timberclear Tuff is a penetrating, clear, water borne exterior finish for timber decks, doors, windows and garden furniture that have been primed with Timberprime Clear. Acrylic Timberclear Tuff is formulated to retain the natural appearance by highlighting the timber grain whilst giving maximum protection against ultraviolet degradation and fungal.

PPG is a global manufacturer of paints, coatings, and speciality materials and a Fortune 200 company with headquarters in Pittsburgh and operations in nearly 70 countries around the world.

Automotive As one of the world's leading producers of advanced automotive paint systems, PPG provides customers with a wide range of product options featuring specific properties to suit virtually any application.

Industrial Coatings PPG continuously develops innovative products which enhance customers' revenue streams through new aesthetics, enhanced performance properties and increased application efficiency. PPG has an integrated global team of professional colour stylists, chemists and technical application experts to help manufacturers to turn new coatings technologies into viable products which will integrate seamlessly into global supply chains.

Protective and Marine Coatings PPG is widely recognised as a world leader in protective and marine coatings, developing innovative, cutting edge products and services that are designed to deliver value for money and protect customers' assets.

AMERLOCK 400 Epoxy Coating Amerlock

is the high-solids (85%), high-build epoxy protective coating that has revolutionised maintenance painting in tough industrial, marine and offshore environments around the world. Amerlock coatings are especially formulated to solve complex corrosion problems with minimal preparation. For durable, dependable protection from chemicals and corrosion in a variety of industrial and Infrastructure applications, there is an Amerlock coating for every maintenance job – even yours.

Sigmaprime Universal primer - increased environmental compliance. The SIGMAPRIME range offers excellent water and corrosion resistance when applied to steel and non-ferrous metals, exhibiting excellent adhesion, flow and wetting properties, as well as outstanding crack resistance and edge retention. It provides exceptional anti corrosive protection due to its excellent adhesive qualities on shop primer, steel (blasted or mechanically pre-treated), aluminum, stainless steel, galvanized steel and hydro-jetted surfaces. The SIGMAPRIME universal primer can also be overcoated with virtually all other coating types, such as epoxy, polyurethane, acrylic, alkyd, chlorinated rubber, vinyl and fire retardant.

Sigmadur 550 Hard working coatings with a long lasting finish PPG SIGMADUR 550 is an aliphatic acrylic polyurethane gloss finish coat designed to protect the most visible surfaces where lasting, high-quality appearance is every bit as important as protection. Packed with a number of high-performing characteristics, it is the perfect choice for a variety of situations, including those in the toughest environments, such as offshore platforms, the exterior of oil and gas storage tanks, bridges, stadia, amusement parks, wind and transmission towers.

Sigmarine 48 General purpose gloss finish, cost effective above-water protection. SIGMARINE 48 is an economical finish coat that fits this scenario perfectly and helps to present a good corporate image whilst protecting the asset. This coating provides value for money, asset protection, and a professional appearance combined with minimal application cost and reduced application effort.

Sigmashield 880 Multipurpose surface tolerant epoxy for protecting assets in extreme industrial and marine environments. As a fast drying, single coat system, PPG SIGMASHIELD 880 speeds up the coating process and minimizes downtime. Application is simplified further by the coating's high surface tolerance (suitable for damp or wet-blast clean substrates), extended recoat window and high film thickness that is achieved in just one coat.
